CALL FOR
POSTER PROPOSALS 2025

BITFLIP CONFERENCE
19 - 20 NOVEMBER 2025

Dear All,

We are pleased to invite you to submit a poster abstract to the second edition of **BITFLIP** conference, which will be held **from 19th to 20th November 2025** as part of the **European Cyber Week** in Rennes, France.

This 2-day workshop brings together academic, industrial, and institutional experts from France and across Europe in the fields of:

- **Hardening techniques** (e.g., against radiation effects)
- **Hardware and software protection** (e.g., fault injection cybersecurity)

It offers a unique opportunity to exchange ideas on fault tolerance and protection against fault injection attacks in a single event, combining institutional overviews, industrial experience, and cutting-edge academic research.

We encourage PhD students to present their ongoing research through a **poster session**, which will foster discussions with experts from various disciplines.

Important:

- Posters must be prepared **in English**, as the BITFLIP audience is international
- The **best poster** will be awarded a prize during the conference

How to submit:

- Send a short abstract (max. 1 page) describing your poster's topic
- Indicate your name, affiliation, and contact details
- Submission deadline: 17th October 2025
- Email submissions to: conference@creachlabs.fr

We look forward to your contributions and to seeing you in Rennes for this exciting event!

Best regards,
The BITFLIP committee
